

Quality and Environmental Manager

LEAX Group is a medium-sized industrial company that after one year of declining volumes starts to grow again. Our main product is processed components that we supply to the international clients. LEAX Group currently has about 400 employees in five companies in Latvia and Sweden. In Latvia we are located in Pinki and Rezekne.

LEAX Baltix looks for a Quality and Environmental Manager

As a Q & E manager at LEAX Baltix, you will be responsible for the operational quality and environmental assurance and you will be reporting to the Managing Director.

Your tasks

- Use quality tools to detect possibilities for improvements on our processes and products.
- Be the key driver for achieving quality improvements.
- Maintain and develop Q & E system
- Run Q & E related education programs for our personnel.
- Run Management system audits and process/product audits.
- Be a member of the Management team.

Your education and experience

- At least 1st level higher education (preferably in Technical sciences);
- Competence in quality system management and/or experience working as a quality system manager;
- 1-2 years of industrial experience.

In order to do the job, you must be

- Organized and able to work in groups and at the same time be independent. LEAX work with "independence", both internally and externally, which requires that you as a person is willing, within a given framework, take your own initiative and have a drive in your work. To succeed and thrive in this job, it is important that you have your own drive and likes to take initiative.
- Of course you have a technical interest and you like to learn new technologies.
- You are more eager to be out in production than to sit in the office.
- You write and speak English and Latvian fluently.

The employment will be located in Pinki.

For the right person there are fantastic opportunities to develop together with the company and have expanded responsibilities and participation in our exciting business building.
